OBJECTIVE

Seeking a cybersecurity internship (stage) in a SOC or network security team.

INTERESTS

Defensive Security
SOC Operations
Incident Response
Threat Intelligence
Cloud Security

PROFILE

Cybersecurity student at CMC OFPPT with hands-on lab experience in packet capture and traffic analysis (tcpdump, Wireshark, Nmap) and enterprise network configuration (Cisco Packet Tracer, VLANs). Documents every lab on GitHub with verifiable results. Seeking an internship to apply these skills and learn from experienced security professionals.

PROJECTS

Network Traffic Analysis Lab

Nov 2026 · Completed

github.com/abdellahchaou/network-traffic-analysis

- Captured and analysed ICMP, DNS, HTTP/HTTPS and port-scan traffic on Kali Linux (VMware) with tcpdump and Wireshark.
- Detected an Nmap SYN scan against Metasploitable 2 on an isolated host-only network: 2,029 packets accounted for, 23 open ports matched Nmap exactly.
- Showed HTTP exposing credentials in cleartext versus HTTPS, and the TLS SNI still revealing the site name.
- Cross-checked every finding with a second tool; kept a pcap containing a public IP out of the public repo.

Tools: tcpdump, Wireshark, Nmap, dig, whois, Kali Linux, VMware, Git

Enterprise Network Lab

In progress

github.com/abdellahchaou/Entreprise-Network-Lab

- Designed an enterprise network topology in Cisco Packet Tracer.
- Configured routers and switches (Cisco IOS) and created VLANs.
- Next: trunking, inter-VLAN routing, DHCP/DNS, SSH and ACLs.

Tools: Cisco Packet Tracer, Cisco IOS

CERTIFICATIONS

Fortinet NSE 1 Certified in Cybersecurity — Nov 2026
Fortinet · credly.com/badges/026b3a68-1776-4249-9e3b-715cb64c0676

Cybersecurity and Cloud Fundamentals v1.0 (NSE 1 Exam) — Nov 2026

Introduction to Cybersecurity — Nov 2026
Cisco Networking Academy · credly.com/badges/c8207f04-bb67-45c3-ba94-178e61011867

TECHNICAL SKILLS

Networking	TCP/IP, VLAN, Switching, Routing, Network Configuration
Traffic analysis	Packet capture, BPF & Wireshark display filters, ICMP, DNS, HTTP, TLS
Operating systems	Linux Administration, Ubuntu, Kali Linux
Security	Core Security Concepts, OWASP Top 10 Awareness, Port Scan Detection, SIEM Fundamentals
Tools	Wireshark, tcpdump, Nmap, Cisco Packet Tracer, VMware, Git & GitHub

EDUCATION

Cybersecurity Program — Current
